

Guided Choices Booklet 2022-2024

My Guided Choices

Please read through this booklet carefully.

This booklet contains information on each of the subjects available to you in Year 10. If you would like further information on any of the subjects, please see the member of staff highlighted at the bottom of each page.

You need to select your guided choices using the paper form or the online form by Thursday 31st March 2022. Paper forms should be returned to Mr Sorrento.

Choosing A Path For Your Future

At Cliff Park Ormiston Academy, we work very hard to ensure all students reach their full potential. It is very important to us, therefore, that our curriculum delivers a rich and varied range of opportunities, thus producing successful students ready for the challenges of life in the 21st century. By combining the hallmarks of a traditional secondary education with a progressive vocational curriculum, relevant to contemporary life and future employment, we have become one of the leading secondary academies in the area for exam results and progression.

Selecting options is an important part of the process. It is your opportunity to explore your interests, prepare for your future and to begin further studies that will flourish into success. It is essential, therefore, to carefully consider the option subjects you choose. Make the choice based on your interests, what you want your future to look like and, above all, what you enjoy.

This booklet outlines what you need to know to make an informed decision throughout this process. You have the opportunity to consider each course before making a decision on the wider curriculum you wish to pursue.

Please also speak to your Community Assistant Principal, Form Tutor and subject teachers, if you require any further information.

Mr Sorrento **Vice Principal**

The Core Curriculum

Your curriculum in Years 9-11 will comprise of the following:

The CORE (compulsory) Courses
English
Mathematics
Science
Religious Studies (as part of 'Character and Culture')
Core Physical Education
Foundation Ebacc Subjects
Humanity (Geography or History)
Modern Foreign Language (as an option subject)
Option Subjects
You will also get to select three 'optional subjects'

Careers (CEIAG) and Social, Moral, Spiritual & Cultural Education (SMSC)

As part of your core curriculum, you will continue to study 'Character and Culture', alongside Religious Education.

This subject promotes SMSC, PSHE and British Values by covering important topics such as sex education and by incorporating activities that are designed to encourage effective relationships.

Careers guidance is built into your Form Time programme and 'Character and Culture' lessons. You will have access to our Careers Lead and will have the opportunity to get involved in many of the activities we have planned with the University of East Anglia, local colleges, businesses and other organisations.

An overview of what you learn within 'Character and Culture' can be found on our website: Cliff-Park-Character-and-Culture-Map

The English Baccalaureate

The English Baccalaureate is designed to offer a broad set of academic subjects and will be awarded to you if you secure good (Grade 5+) GCSE passes in English, Mathematics, the Sciences, a Modern Foreign Language and a Humanity (History or Geography).

Cliff Park Ormiston Academy will ensure that the curriculum suits the needs of all students and offers a personalised provision enabling you to achieve success. We recognise that the English Baccalaureate is an important part of your progression to higher education and employment and have, therefore, ensured our curriculum provides you with the opportunity to achieve this qualification set.

We have identified, using performance data, students who we feel would benefit from following the English Baccalaureate in their future careers. These students will study core subjects (either Geography or History) and a Modern Foreign Language (either French or German). Students will then have two other options to choose from. This combination of subjects provides a broad and balanced curriculum and ensures that NO future pathway is closed to you. This combination of subjects is highlighted as desirable from the best universities and the business community. If you would prefer to not follow the English Baccalaureate or if you have not been identified and would like to follow this route, then you should discuss this with Mr Sorrento.

Vocational Courses versus GCSEs

Each subject within this booklet is highlighted as being either a GCSE or vocational subject.

GCSE subjects are typically taught over two years with final examinations taken at the end of Year 11. Most GCSE subjects do not have coursework or controlled assessments.

Vocational courses typically have controlled assessments and/or examinations that are completed throughout Years 10 and 11.

How Do I Choose?

- choose courses you know you will enjoy
- choose courses you are interested in
- choose a range of different courses, so that you have a broad base from which to choose your post-16 courses
- read the subject information on the next few pages very carefully
- ask the advice of your subject teachers, your tutor and our careers advisers
- discuss it with your parents
- **think very carefully** about the subjects you choose. It is very difficult indeed to change courses once you have started
- research and explore careers and find out what qualifications you will need.

- choose a course simply because your friends have
- allow either like or dislike of particular teachers to influence your choice
- choose a course because you think it might be easy
- drop any subject you may require for entry to a particular occupation or course

Details about courses are subject to change. We do our best to accommodate your choices, but it may be necessary to ask you to take reserve choices. We are offering a wide range of courses but may not be able to run them all. Decisions about which can run will be based upon numbers choosing them.

Art and Design (Vocational)

You will be learning about:

Different artists (historical, modern and contemporary), designers and art cultures. You will have the opportunity to focus on the ones that interest you for example Robert Banksy, Pablo Picasso, Antony Gormley, Damien Hirst, Cartoon artists (Marvel comics and Walt Disney), Manga, Aboriginal, Egyptian, Stella McCartney, Vivienne Westwood and many more.

You will develop practical skills in a wide range of two and three-dimensional art materials and then focus on one or more materials of interest including drawing (pencil, colour pencil, pastel and mixed media), painting, sculpture, textiles, digital photography, printmaking (mono, lino and etching), computer aided design (Photoshop and Paint Shop Pro) etc. You will have the opportunity to work with local artists, visit local art industries and galleries.

How will this subject help me in the future?

Art and Design develops your visual knowledge and practical skills as well as your critical understanding skills both in a spoken and written way. These are invaluable life skills and will help out with all careers, but especially art related ones such as animator, architect, artist, designer (computer, costume, textile, interior, landscape and web), film/TV director, hairdressing, illustrator, photographer, make-up artist, teaching, and many more.

Who should I ask if I need more information?

Mr Cullen or Ms Langhan

PLEASE NOTE: Students cannot take Art and Textiles together as they follow the same course.

Child Development (Vocational)

You will be learning about:

The Tech Award gives learners the opportunity to develop applied knowledge and understanding of child development and growth up to the age of five.

Learners will have the opportunity to develop applied knowledge in the following areas:

- the characteristics of children's development from birth up to five years
- factors that affect growth and development
- the importance of play
- how play promotes children's learning and development
- reasons why children may need support
- child-friendly environments to support play, learning and development in children from birth to five years old
- supporting all children to learn and develop physically, intellectually, emotionally and socially, and adapting activities to support children's play, learning and development.

Students will be assessed in 3 components. 2 of these will be controlled assessments completed in lessons and 1 will be an exam completed at the end of the course.

How will this subject help me in the future?

This is a good subject to take if you are organised, can work to deadlines and are enthusiastic about a career in early years. This subject leads well into the college courses and into further education within this sector. It will suit any person who is interested in or looking at professions such as nursing, child care, teaching or social work.

Who should I ask if I need more information?

Mrs O'Brien

Computer Science (GCSE)

You will be learning about:

Computer science is about computer technology, puzzle solving, and unpicking the "magic" of computers. Do you enjoy a challenge? Can you stick with a problem when you get stuck? Are you interested in technology and how it works? If your answer is yes, then this is the course for you!

You will be taught how to break down problems and find solutions to these problems, and then translate these solutions into working software.

You will learn the principles of programming, and how to program.

You will learn about a range of computing topics such as computer hardware and how it works, computer networking, cyber security, how computers represent words, images, sound and other real world information. You will investigate the impacts of digital technology on modern society and where we may be headed with technology in the future.

This is a very exciting, challenging course that will develop your intellect, as well as your prospects. It will set you apart as someone with the inside knowledge on how the computers we all use actually function.

How will this subject help me in the future?

The course will prepare you for further computer science study. It is highly valued as a science GCSE and could form the foundation of a career in the IT industry, but also give you a head start in a wide range of careers including science, engineering, business, finance and security. While developments in technology put many jobs at risk, they increase the need for people with computer science training. The UK is crying out for people with the knowledge and skills you will gain in this course.

Who should I ask if I need more information?

Mr Bufford, Mr Wright or Mr Ford

Creative iMedia (Vocational)

You will be learning about:

Creative iMedia is the creative end of computing. It involves investigating, planning, creating and judging projects such as websites, digital graphic images, adverts, animation and other creative computer products.

A wide range of knowledge and skills, including industry-standard software, are needed to work in the creative digital media sector. You will start at pre-production and develop your skills through practical assignments as you create final multimedia products.

You will develop your ability to produce digital graphics, websites and other multimedia products. You will also have the opportunity to sequence and edit audio and video productions. You will learn about a wide range of software. It also helps you develop those all-important soft skills such as presenting, working with others, working to a brief and communicating concepts effectively.

The course is based on 75% coursework and 25% external examination. The course is set up to mirror the experience of working for digital media companies, working to meet instructions from clients.

How will this subject help me in the future?

95% of UK businesses use computers. More than 90% of jobs require computer use. It is a vocational qualification. It is well regarded by colleges and businesses and sets you up for a world where this combination of creativity, computer literacy and the ability to communicate is a rare commodity.

If you like marketing, digital design, or wish to run your own business (or pick and choose which business you work for) then this is the course for you.

Who should I ask if I need more information?

Mr Bufford, Mr Wright, Mr Ford

Dance - Performing Arts (Vocational)

You will be learning about:

- Working on your ability to work within a group
- Improving your confidence
- Teaching you correct technique
- Allowing you to be expressive and creative
- Improve your knowledge and understanding of health and fitness
- Improve your co-ordination
- The lessons will be mainly practical
- You will be given the opportunity to choreograph your own work based on a variety of themes
- Perform in group and solo pieces
- Respond to work of others
- Explore choreography based on professional works
- Analyse and compare a variety of professional pieces

How will this subject help me in the future?

- You can continue your studies at college or 6th Form
- Allows you access to a career in theatre and performing arts
- Improve your good posture
- Access to other dance agencies
- Creative influence!

Who should I ask if I need more information?

Mr Howard

PLEASE NOTE: Students cannot take Dance and Drama together as they follow the same course.

Drama – Performing Arts (Vocational)

You will be learning about:

The theatre styles of Naturalism, Epic and Physical Theatre. There will be a strong focus on exploring these three contrasting performance styles and practically applying the skills and techniques of practitioners and companies to your own practical performances. In addition to this there is a strong focus on researching the different roles required to create a professional production (Actors, Directors, Designers etc) and analyse the responsibilities of these roles through both theoretical work and practical work.

You will contribute to an ethos of skills development through taking part in a range of practical workshops and will be expected to develop the performance related skills of confidence, creativity, flair and technique in front of live audiences and must be prepared to be video assessed carrying out practical rehearsals and performances. In Drama you will have the opportunity to watch and work with professional theatre groups in order to develop your skills, with these experiences leading directly into your work in the classroom. You will also be required to take part in academy performances throughout the year.

Your key focus areas will be:

- The roles and responsibilities of Actors, Directors and Designers
- Effective rehearsal, performance and audition techniques
- Exploring professional scripts and developing your knowledge of how to take a script from the page to the stage
- Skills development across three contrasting styles of performance
- Application of three contrasting theatre practitioners' styles and their influence on modern performance

How will this subject help me in the future?

The Level 2 Drama qualification provides you with the necessary skills and knowledge to continue your Drama study at Level 3 at Post 16 establishments. The course provides you with the building blocks to progress into a career in performance and also develops the key social and interpersonal skills that will be essential in all future career paths. The course gives you the platform to develop your creative mind and group work skills which will ultimately be beneficial to long term personal development.

Who should I ask if I need more information?

Mr Howard

Engineering (Vocational)

You will be learning about:

- The world of engineering and how it impacts on our environment and lives
- Health and Safety in the workplace and the appropriate procedures and legislation
- Different sectors of engineering
- Working as a team to investigate new ideas or solve problems
- Designing and presenting ideas
- Communication, digital skills and business skills
- Manufacturing skills

You will learn how to use machinery and tools safely and correctly to make products.

The qualification includes a range of units to gain an understanding of engineering.

Further information can be found on www.wjec.co.uk/engineering.

How will this subject help me in the future?

Successful completion of the course will enable you to:

- Progress to a Level 3 Engineering course at college
- Apply for an Apprenticeship in a local industry centre
- Enter the world of work in an engineering company.

Who should I ask if I need more information?

Mr Herridge

Geography (GCSE)

You will be learning about:

If you are interested in the world around you, then Geography is the subject for you! Geography is about the world we live in, its people & interactions, how the world is changing, and the impacts of human actions. The world in which we live is likely to change more in the next 50 years than it has ever done before. Geography explains why and helps to prepare you for those changes. Geography tackles the big issues of environmental responsibility, sustainability and our global interdependence. The topics include:

Global Geographical Issues

- Hazardous Earth the global climate system, climate change, extreme weather (tropical cyclones) and tectonic hazards
- **Development Dynamics** global development and a case study of India, an emerging country
- Challenges of an Urbanising World rapid urbanisation and global urban trends, and a case study of Mumbai, a megacity in an emerging country

UK Geographical Issues

- The UK's evolving physical landscape The changing physical landscape, coastal change and conflict, and river processes and pressures
- The UK's evolving human landscape The UK's changing population and a case study of a major UK city
- **Geographical Fieldwork Investigations** 2 fieldwork projects, Investigating coastal change and conflict, and Investigating dynamic urban areas

People and Environment Issues

- People and the Biosphere Biomes and resources provided by the biosphere
- **Forests Under Threat** Tropical rainforests and the taiga biome, characteristics, threats and management
- Consuming Energy Resources Energy resources, the reliance on fossil fuels, changing attitudes to energy and environmental issues
- Making Geographical Decisions Decision Making Exercise involving an unseen Resource Booklet

What skills do I need?

- Information recall and a willingness to revise there is a lot of content to remember
- Motivation for reading and writing
- Evaluating schemes and projects
- Decision making skills, communication and effective team work
- Recognising links between aspects in the world surrounding us
- The ability to interpret statistics, maps, diagrams and photos

Who should I ask if I need more information?

Miss Adcock

Health and Social Care (Vocational)

You will be learning about:

You will take part in 3 components. 2 will be completed under controlled conditions and 1 will be an external assessment which is set by Edexcel.

The Tech Award gives learners the opportunity to develop applied knowledge in the following areas:

- the life stages and key characteristics in the physical, intellectual, emotional and social (PIES) development classifications and the different factors that can affect an individual's growth and development
- different life events and how individuals can adapt or be supported through changes caused by life events
- health and social care conditions, how they can be managed by the individual and the different health and social care services that are available
- the barriers and obstacles an individual may encounter and how these can be overcome
- the skills, attributes and values required to give care and how these benefit the individual
- how factors can affect an individual's current health and wellbeing
- how physiological indicators and an individual's lifestyle choices determine physical health
- the use of the person-centred approach

How will this subject help me in the future?

Health and Social Care is a good subject to take if you are organised, conscientious and are enthusiastic about a career in the health services. This subject leads well into the college courses and onto further education. It will suit you if you are interested in or looking at professions such as nursing, care work, midwifery, teaching, social work, or working with disabilities or childcare.

Who should I ask if I need more information?

Mrs O'Brien

History (GCSE)

You will be learning about:

Superpower relations and the Cold War 1941-91. We study how the aftermath of the 'hot wars' of WW1/WW2 led to nearly 50 years of 'cold war'. This is a very topical unit of work that focuses on relations between the 'west' and the Soviet Union led by modern day Russia. It will give a context to the conflict that still exists in the region formerly known as the USSR (Union of Soviet Socialist Republics). We examine how tensions that existed during WW2 extended into the post-war period. It covers major events in modern history, from the Cuban Missile Crisis, and the Arms Race, through to the fall of the Berlin Wall and the collapse of the USSR in 1991.

Early Elizabethan England 1558-88. This unit examines Elizabeth's problems on her accession and the pressures she faced during her early reign. We examine how Elizabethans grappled with poverty and homelessness, religious fanaticism and relations with Europe: issues that are as relevant now as they were nearly 500 years ago.

Medicine in Britain c1250 – present. This unit examines change and continuity over 8 centuries. Where do our ideas about the cause and treatment of disease, anatomy, physiology, methods of surgery, public health and the training of medical practitioners come from? How were they different in the past and what factors caused them to change? We also examine British medicine on the western front during World War One.

Weimar and Nazi Germany 1918-39. This unit examines the impact of German democracy following the First World War. We learn how and why this democracy was destroyed by economic circumstance, political trickery and Hitler's Nazi Party. We also investigate Nazi policies before the Second World War and the impact they had on ordinary Germans.

How will this subject help me in the future?

History teaches you about the world you live in by building up an understanding of the world in other times, under different (or sometimes similar) circumstances. In short, studying History allows you to be a citizen of the world. For this reason alone, it is worthwhile pursuing.

History is also very useful in any career that requires good communication, the ability to argue, spot trends and question and analyse significance such as journalism, law, accountancy or politics.

Students should know that the study of History requires a lot of reading and success in this subject is measured through three examinations at the end of Year 11. The questions mostly consist of essays, which is nothing to fear as long as you are prepared in advance and are willing to work hard independently and as part of a team.

Who should I ask if I need more information?

Mr Sewell

Hospitality (Vocational)

You will be learning about:

The Hospitality Industry and how it operates, food production, preparation, cooking and presentation as well as and nutrition behind the food. Most of the knowledge is taught through practical cooking, producing industry style dishes, cooking almost every week. You will learn and demonstrate the importance of colour, texture, flavour, time management, the hospitality industry and meeting the nutritional needs of customers. You will develop a wide range of culinary skills, appropriate methods of cooking and presentation.

By the end of the course, you will need to demonstrate knowledge of:

- Health, safety and hygiene legislation
- Nutrition and special diets,
- Costing of dishes
- Food allergies and intolerance
- Menu planning
- Cooking methods

The qualification is made up of two exams; one is a written exam about the Hospitality Industry and how it operates including different business types, job roles and skills along with how to keep customers and staff safe. The second unit is a practical exam, where you will plan and prepare suitable dishes to meet the needs of a realistic hospitality business.

How will this subject help me in the future?

This is an ideal course to give you the skills and knowledge needed to work in the Hospitality, Catering and Leisure Industries, which are major employers in Norfolk and East Anglia. This course will support applications and progression onto catering and leisure courses at the local FE colleges.

Who should I ask if I need more information?

Mrs Roe

Media Studies (GCSE)

You will be learning about:

Media is about communication, particularly mass communication with lots of people. The media creates products that are designed to entertain and inform, created for lots of people to hear, watch or read, often at roughly the same time. Whenever you are watching television, streaming films, scrolling through social media or listening to a podcast, you are consuming media.

As a GCSE Media Studies student, you will analyse how media products like TV programmes and music videos use images, sounds, language, and representations to create meaning. You will learn about the media industry and how the industry affects how media products are made. You will investigate media audiences, exploring who are the people who watch, read and consume the products, and considering how different people might be affected by media products differently, and why. You will study lots of different media forms, such as:

- Television
- Online Media
- Advertising

- Film Marketing
- Magazines
- Newspapers

- Music Video
- Radio
- Video Games

Assessment will consist of both examinations (70%) and a controlled assessment (30%).

How will this subject help me in the future?

You will practice a range of skills which will equip you for progression to A Level study. They will also help you hugely in other areas such as Film, English, Humanities and Social Sciences. Looking further ahead, over one hundred universities offer courses in Media, Communications and Cultural Studies in the UK. An A Level in Media Studies helps you to move towards these courses, as well as to those in a range of other areas. If university isn't for you, there is a huge array of career opportunities in the media, and it's an industry that is growing very quickly.

If you are interested in the idea of a career in TV and film production, advertising, journalism, interactive media, and digital marketing, technical production, special effects, web design and post-production, then studying Media at GCSE level is a great place to start.

Who should I ask if I need more information?

Mr Sorrento

Modern Foreign Languages (GCSE)

You will be learning about:

Students are able to study <u>French</u> or <u>German</u> at Cliff Park Ormiston Academy. Both language courses are split into four elements:

- Speaking
- Listening
- Reading
- Writing

You will be exploring a number of different themes, developing your vocabulary in each. Languages require students to learn 'a little and often' in order to become confident linguists. With this in mind, a strong work ethic and the ability to work independently are key. Class participation is vital as it will help you develop your confidence necessary to tackle the Speaking Examinations. We value every effort.

How will this subject help me in the future?

By taking a language at GCSE you'll have amazing skills and a valuable talent that's applicable to almost everything you do - so, it's quite a handy subject really. A language GCSE builds on what you've already learnt in years 7 and 8 and you probably know more than you think. By taking a language GCSE, you don't just learn the language, you get to find out about other people, countries and cultures so it really is an interesting and varied subject that opens doors to working across the world.

Who should I ask if I need more information?

Mrs Ribery or Mrs Malley-Chambers

PLEASE NOTE: Students may be invited to opt for a language as part of the English Baccalaureate.

Music (Vocational)

You will be learning about:

The Music course is industry-focused with a high level of practical skills applied. A keen interest in music and the ability to play an instrument is essential. This is an area which you will develop over the course of each lesson.

You need to be willing to work both independently and as part of a group to complete band style projects. There is still the element of written work to support your practical units so you must be able to work to a deadline independently.

You will receive individual 1:1 tuition on your chosen instrument/voice each week with an external teacher and it is essential you attend these lessons to make progress. You will also be asked to perform at various events throughout the year.

The units recognise the importance of knowledge about music and the music industry, the role of the individual, coupled with music performance skills.

You will:

- Complete detailed analysis of different music styles
- Learn to develop your instrumental/singing techniques
- Discovering the best ways to achieve a good performance.
- Establish a good rehearsal and practice technique
- Apply knowledge of music theory to extracts of music and performance.

How will this subject help me in the future?

The course provides you with excellent preparation if you wish to continue with music in your post 16 studies, or work in the music industry.

Who should I ask if I need more information?

Mrs Howard

Sport (Vocational)

You will be learning about:

You will be learning to:

- explore different types and provisions of sport and physical activity for different types of participant
- examine equipment and technology required for participants to use when taking part in sport and physical activity
- be able to prepare participants to take part in sport and physical activity
- understand how different components of fitness are used in different physical activities
- be able to participate in sport and understand the roles and responsibilities of officials
- demonstrate ways to improve participants' sporting techniques
- developing fitness to improve participants' performance in sport and physical activity

How will this subject help me in the future?

- You can continue your studies at college
- You can use your skills and knowledge in the world of work, sport and leisure
- You will have gained the knowledge to pursue a healthy lifestyle

Who should I ask if I need more information?

Miss Taylor, Mr Warnes, Mr Callaby or Mr Aldous

Sociology (GCSE)

What is sociology?

Sociology is the "science of society." It is the study of people's behaviour in groups.

You will be learning about:

Education - This will involve investigating a variety of issues from the role of education and if everybody gets the same opportunities. Some questions you will consider:

- What is school for?
- Why are girls getting better exam results than boys?
- How much difference do schools actually make and how?
- Does it matter what your teacher thinks of you?
- Does your background or class, gender or ethnicity affect your exam results?
- Should there be private schools?

Families and households - This will involve investigating a variety of issues of how relationships within families have changed over time and how family differs in the UK with those in other countries. Some questions you will consider:

- How and why are families changing?
- What is the function of family?
- Is marriage still important?
- Why is the divorce rate rising and what are the consequences?
- Do men and women have certain roles in family?
- Does equality exist between the sexes?

Crime and Deviance with Theory and Methods - You will examine and discuss how crime is related to time, place, social situation and culture. Some issues you will consider are:

- What is crime?
- What is deviance?
- How is crime measured?

- Who and why do people commit crimes?
- Why do men commit more crimes?
- Why does class, gender and ethnicity affect criminal behaviour?
- Do the rich and powerful avoid punishment for their crimes?
- Should we sentence young people to prison?
- Should we have prisons?
- How does the media affect crime?

Social Structure - You will examine the very structure of British society. Some questions you will consider:

- Why are some people rich, why are some people poor?
- What are the factors that affect life chances?
- Do we all have the same life chances and opportunities in the UK?
- Can someone from a poor background get rich?
- Does real poverty exist in the UK?
- Do benefits help people or make them lazy?
- Who has the power in the UK?

How will this subject help me in the future?

Studying Sociology gives you the opportunity to gain an understanding of the world around you and to reflect on social issues that relate to you. Sociology studies society, how it is changing and how it can be improved. It examines the ways we learn to fit in into society and what happens if we don't!

Sociology will help with careers such as being a police officer, teacher, social worker, counsellor, family support worker, journalist, lawyer, politician and many others.

Who should I ask if I need more information?

Mr Mills

Textiles (Vocational)

You will be learning about:

Different textile artists (historical, modern and contemporary), designers and art cultures. You will have the opportunity to focus on the ones that interest you for example Cecile Perra, Lisa Kokin, Victoria Villasan, Sue Stone, Constance Howard, Jan Beaney, Cath Kidson, African Art, Australian Aboriginal Art, Stella McCartney, Vivienne Westwood and many more.

You will develop practical skills in a wide range of two and three-dimensional textiles materials and then focus on one or more materials of interest, including free-motion embroidery (sewing machine), machine stitching, fabric manipulation, fabric printing (sublimation printer), embroidery, weaving, embellishing (embellisher machine), tie dye and batik.

In upper school Textile Art, you will have greater opportunities to work with local artists, visit local art industries and galleries.

How will this subject help me in the future?

Textile Art develops your visual knowledge and practical skills as well as your critical understanding skills both in a spoken and written way. These are invaluable life skills and will help out with all careers, especially textiles related ones such as a clothes designer, interior designer, tailor, seamstress, costume designer, artist, teacher, retail and many more.

Who should I ask if I need more information?

Ms Langhan

Travel and Tourism (Vocational)

BTEC Travel and Tourism is a vocational qualification designed for people interested in the travel sector. This qualification will sharpen your skills for employment or further study.

You will be learning about:

The BTEC Travel and Tourism course is split into three units. Two units will be assessed through course work and one unit through an external exam:

Component 1: Travel and Tourism Organisations and Destinations:

You will investigate travel and tourism organisations in the UK, their ownership, aims, key products and services, and how they work together. You will explore the role of different consumer technologies within the travel and tourism industry. Understanding the different types of tourism and different types of visitors and investigating the features that appeal to those visitor types.

Component 2: Customer Needs in Travel and Tourism:

You will investigate how organisations use market research to identify travel and tourism trends and identify customer needs and preferences. Applying their understanding by exploring how specific needs are met by organisations.

Component 3: Influences on Global Travel and Tourism:

This unit you will explore the different factors that may influence global travel and tourism, and how travel and tourism organisations and destinations respond to these factors. By examining the potential impacts of tourism at global destinations and how destinations can manage the impacts of tourism and control tourism development to achieve sustainable tourism.

How will my subject help me in the future:

Travel and Tourism opens doors to careers such as a travel agent, working as cabin crew, Tourist information representatives or to study the subject at college or university. You could gain travel experience through voluntary work overseas or in a work placement at a travel company.

Who should I ask if I need more information?

Mr O'Brien

Triple Science (GCSE)

You will be learning about:

Do you really like science? Do you want to study it in more depth and detail? You do not need to study triple science in order to go on to study science subjects at 'A' level. However, triple science allows you to study biology, chemistry and physics in more detail and sit examinations in all three disciplines separately.

In biology, you will study the structure and function of the human body and plants in more depth and develop a deeper understanding of DNA, genetics and evolution.

In chemistry, you will study analytical techniques, material science and carbon chemistry in more detail as well as considering the impact chemistry has upon the world around us.

In physics, you will study the main concepts of space, forces, energy and radioactivity in more detail, as well as considering the role of waves for detection and exploration purposes.

How will this subject help me in the future?

Science allows you to develop and use many critical thinking skills that we use every day. It allows you to understand how the world around you works and to answer some of the questions facing society today. It shows analytical, practical and academic skills that are all transferrable to any course or career path you choose after year 11.

Who should I ask if I need more information?

Mrs Ford

PLEASE NOTE: Students opting for Triple Science must have a predicted grade of 5 or above in Science.
